Portfolio: https://portfolio-two-fawn-44.vercel.app/

GOAL

Work as a UX/UI Designer or Product Designer, developing user-centered digital experiences and applying artificial intelligence to design processes to increase the efficiency and quality of solutions. I have a strong interest in the intersection between design and psychology, using principles of human behavior and cognitive biases to reduce friction, improve decision-making, and enhance the user experience.

PROFESSIONAL SUMMARY

Professional with experience in data analysis and digital strategy, working in the retail, investment, insurance, and media sectors, transitioning to UX/UI Design and Digital Product Design. International experience at Woolworths Group, contributing to mobile app adoption initiatives that increased app usage by customers in-store by approximately 25%, through onboarding improvements, UX optimization, and digital promotion strategies.

Background in business intelligence and data analysis, with experience in economic scenario analysis, database management, and the creation of analytical reports that improved decision-making efficiency and reduced analysis time by up to 30% through structured dashboards and optimized data workflows.

Experience in digital marketing and content strategy, managing social media communication and publishing content that increased audience engagement and interaction across digital channels.

Skilled in prototyping, digital product development, and AI-assisted design workflows, applying modern tools to accelerate design iteration cycles, improve productivity, and streamline the development of digital solutions.

LANGUAGES

Portuguese: Native **English:** Fluent **Spanish:** Basic

ACADEMIC BACKGROUND

Bachelor's Degree in Business Administration

Pontifícia Universidade Católica de São Paulo (2019 – 2023)

VET Course Diploma of Technology

Canterbury Technical Institute – Australia (2024 – 2025)

PROFESSIONAL EXPERIENCE

Operations Analyst | Vivendi Seguros (Health Insurance) | Brazil – São Paulo | 04/2023 – current job

- Managed internal technology tools and business documentation, improving internal information access and reducing document retrieval time by approximately 30%.
- Organized and maintained health insurance documentation and historical records, ensuring 100% compliance with internal documentation standards and improving audit readiness.
- Built reports and data presentations for clients and stakeholders, supporting decision-making and reducing reporting preparation time by around 25%.

Junior UX Designer – Growth | Woolworths Group (Retail Industry) | Australia – Queensland | 08/2024 – 03/2026

- Designed UX improvements to increase adoption of the Woolworths Group mobile app among in-store customers, contributing to an estimated +25% increase in app adoption within a 6-month period.
- Improved onboarding flows and mobile usability, reducing friction for first-time users and decreasing onboarding drop-off by approximately 18%.
- Collaborated on in-store promotional strategies to drive digital engagement and app usage.
- Applied product thinking to align UX decisions with growth metrics and customer behavior.

Investment Advisor & BI Intern | Agnus Investimentos XP (Investment Advisory) | Brazil – São Paulo | 02/2020 – 10/2022

- Analyzed economic scenarios and client investment portfolios to support strategic allocation decisions across different asset classes.
- Performed portfolio rebalancing and financial strategy adjustments, helping improve portfolio risk-return balance and increasing average portfolio performance by approximately 8% during the analysis period.
- Managed financial databases and conducted data analysis using advanced spreadsheets, improving data organization and reducing analysis preparation time by around 30%.
- Built dashboards and analytical reports to support decision-making for clients and internal stakeholders.

Marketing Intern | Rádio Antena 1 (Radio Station) | Brazil – São Paulo | 06/2018 – 01/2020

- Created social media content for Instagram, Facebook, and TikTok, contributing to ~35% growth in audience engagement across digital platforms.
- Published interview highlights and program clips, helping increase average video reach by approximately 28% on social media channels.
- Started managing data for performance dashboards to monitor audience metrics and support digital strategy decisions.
